

DE-ODORIZE

SANITIZE

DETER PESTS

- **GO-2L**

Compact version of full size. Uses two UV lamps to sanitize smaller areas such as trash chutes, closets and cars.

- **GO-4L**

Our most popular Ozone Generator. This four lamp model is considered the industry standard. Suitable for trash compactors, larger rooms and apartment odor removal.

- **GO-5L**

Supercharged with five UV Lamps, this is the strongest on the market, yet still compact. Ideal for large trash rooms and the most offensive clean ups,

GLACIER OZONE AIR PURIFICATION SYSTEM

Simply the strongest odor fighting equipment on the market. Our clean Ozone Generators don't just cover odors—they eliminate them.

Like the clean smell after a rain or lightning storm, ozone is generated by producing an ultraviolet light wavelength that converts some of the oxygen surrounding the environment into supercharged oxygen molecules that attach to carbon, seeking out and destroying odors and the Volatile Organic Compounds (VOC's) that cause them.

**OFFENDING ODORS, BACTERIA, FUNGI AND VIRUSES SIMPLY
CANNOT SURVIVE EXPOSURE TO GLACIER OZONE'S TECHNOLOGY**
